ANIKET HAUSERAO KADAM

AI/ML Engineer | GenAI Developer | Backend Developer

Pune, Maharashtra, India | +91 9765618537 | aniketkadam792001@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

AI/ML Engineer with production experience building a fintech nano/micro-financing platform: REST APIs, JWT/OAuth/RBAC-secured backend services, 10+ classification models, real-time chat/calling, and Gemini-powered voice features, within a Docker-based microservices architecture. Skilled across backend (Flask), mobile (React Native), and GenAI development (LangChain, RAG, Gemini API).

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Frontend / Mobile: React Native, react.js, Tailwind CSS

Backend: Flask, REST APIs, Microservices, JWT Authentication, OAuth, RBAC, Cookie/Session Auth, Rate Limiting, Input Validation, Unit/API Testing

AI / ML: Machine Learning, Classification (Logistic Regression, Random Forest, XGBoost), Feature Engineering, Model Evaluation, LLMs, RAG, Prompt Engineering, LangChain, Hugging Face, Gemini API

Real-Time & Integrations: WebSockets (Flask-SocketIO), WhatsApp API, Speech-to-Text, Text-to-Speech

Databases: MongoDB, MySQL, Radis

Cloud & DevOps: Docker, Git, GitHub

Tools: Cursor, Claude, Jupyter, VS Code, PyCharm

EXPERIENCE

AI Intern — 1GEN *Jan 2026 – Aug 2026*

- Contributing to Project Pebble, an AI-powered fintech nano/micro-financing platform, building React Native app features, Python (Flask) backend services, and AI-powered functionality
- Built RESTful APIs and integrated MongoDB to power core platform services
- Implemented JWT authentication, OAuth, and role-based access control (RBAC) with cookie/session-based auth; added rate limiting, input validation, and unit/API tests to harden backend services
- Trained and evaluated 10+ classification models (Logistic Regression, Random Forest, XGBoost) with feature engineering, supporting financing-decision workflows
- Integrated Gemini API for voice capture, speech-to-text, and text-to-speech functionality
- Built real-time chat and in-app calling using WebSockets (Flask-SocketIO), plus WhatsApp messaging integration via a third-party API
- Worked within a Docker-based distributed microservices architecture, with multiple repositories deployed across multiple servers
- Used Gemini AI, Claude, and Cursor to accelerate development, debugging, and deployment

PROJECT

Pebble — AI-Powered FinTech Platform (Nano Pe) *Production – 1GEN*

Tech Stack: *Python (Flask), React Native, MongoDB, Docker, Gemini AI, WebSockets, REST APIs, Distributed Microservices*

- Built an AI-powered fintech application spanning a React Native app and backend services, with REST APIs powering core workflows
- Implemented JWT/OAuth authentication and RBAC, with input validation, rate limiting, and unit/API testing
- Trained 10+ classification models (Logistic Regression, Random Forest, XGBoost) for financing-decision features
- Used Gemini API for voice capture, speech-to-text, and text-to-speech
- Built real-time chat, in-app calling (WebSockets), and WhatsApp integration via a third-party API
- Deployed on a Docker-based distributed microservices setup across multiple servers

EDUCATION

B.Tech in Artificial Intelligence & Data Science — TPCT's College of Engineering, Dharashiv (Osmanabad) 2022 – 2025

CGPA: 7.33

Diploma in Computer Engineering — Vidhya Pratishthan Polytechnic College, Indapur 2019 – 2021

Percentage: 75.00%
